Art Unit: 1746

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 and 11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Japan'928 (Japan 2000-209828), Japan'123 or (Japan 2002-28123) or Japan'570 (Japan 2002-655570).

Re claim 1, note that all of the references disclose a dishwasher comprising: a main body being generally of a box shape with an open front; a washer tub being extracted from and retracted into the main body through the open front by means of slide rail assemblies, the washer tub having an open top; and a covering member (36 in Japan'828, 40, 54 in Japan'123, 37 and 145 in Japan'570) for blocking a gap to be opened between the washer tub and the main body when the washer tub is fully extracted from the main body, wherein, when the washer tub is fully extracted from the main body, a rear end of an inner wall of the washer tub is located in front of a front end of the main body to open the gap and the opened gap is covered by the covering member. Re claims 2 and 11, Japan'123, and Japan'570 disclose the feeding and draining components at the rear of the tub as well as the electric parts.. Re claims 3 and 4, Japan'570 discloses the backward extending plate (see flange in fig. 8).

Art Unit: 1746

3. Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Welch et al., sergeant et al., Tuller et al., McNairy, Germany'149,, Japan'450 and Japan'714, note the drawers .
